

Color in your Insects

Let's have some creative fun while learning about our insect friends! Grab your crayons, colored pencils, or markers, and get ready to bring these fascinating insects to life with your favorite colors.

Materials Needed

- Printed copies of the coloring pages (see below).
- Coloring supplies (crayons, colored pencils, markers)
- Your imagination and creativity!

STEP 1 : Choose Your Colors

Look at the insects on the coloring page and decide which colors you'd like to use for each one. You can make them as realistic or as imaginative as you want!

STEP 2 : Start Coloring

Carefully color each insect using your chosen colors. Be sure to stay within the lines to make your artwork look neat and colorful.

STEP 3 : Add Details

Don't forget to add details like eyes, stripes, or spots to make your insects look even more interesting and unique.

STEP 4 : Get Creative

You can also add a background to your coloring page. Maybe the insects are in a garden, a forest, or even on another planet! It's up to you.

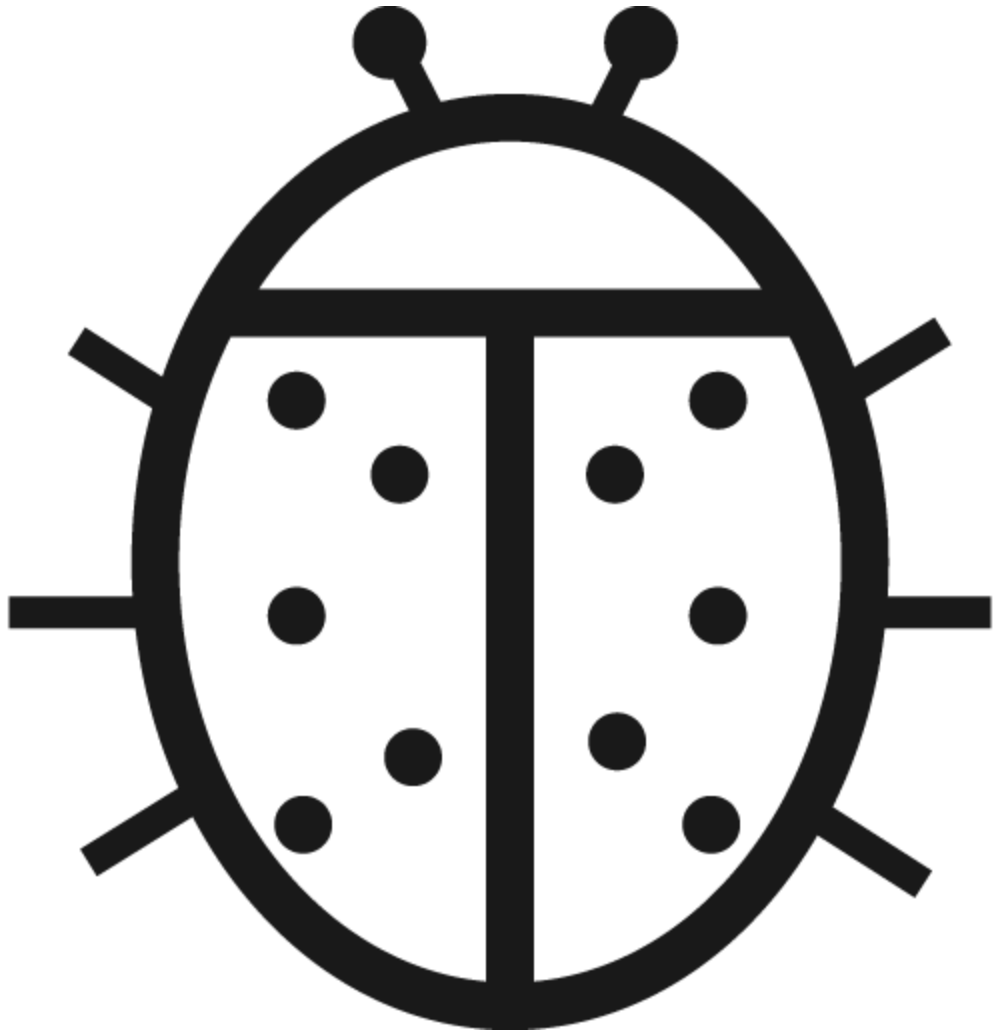

STEP 5: Share Your Art

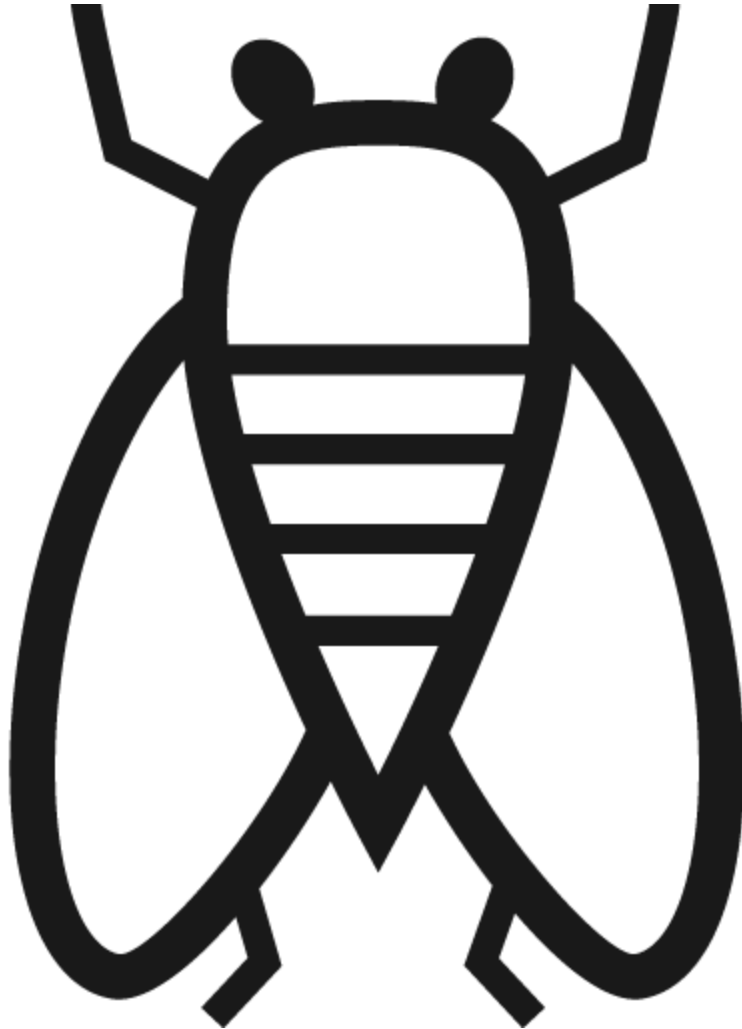

Once you're finished coloring, proudly display your artwork or share it with friends and family. You can even talk about the insects you colored and what you've learned about them!

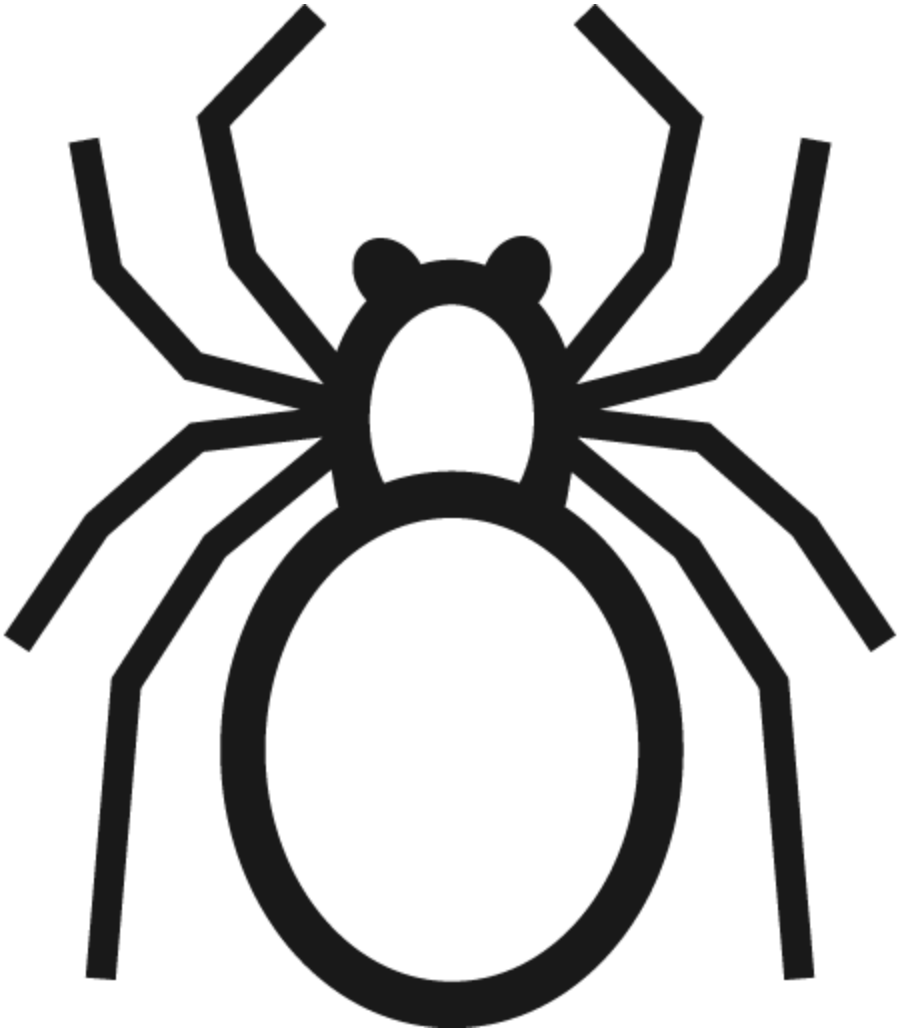

Lady Bug

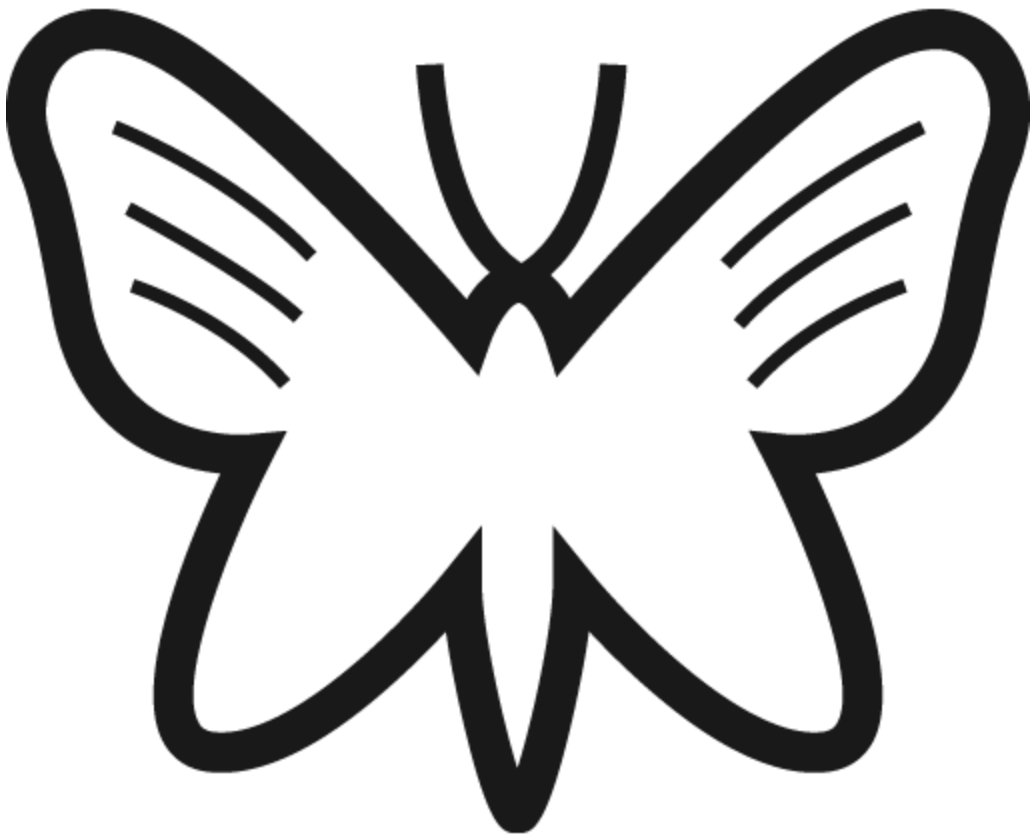

Fly

Spider

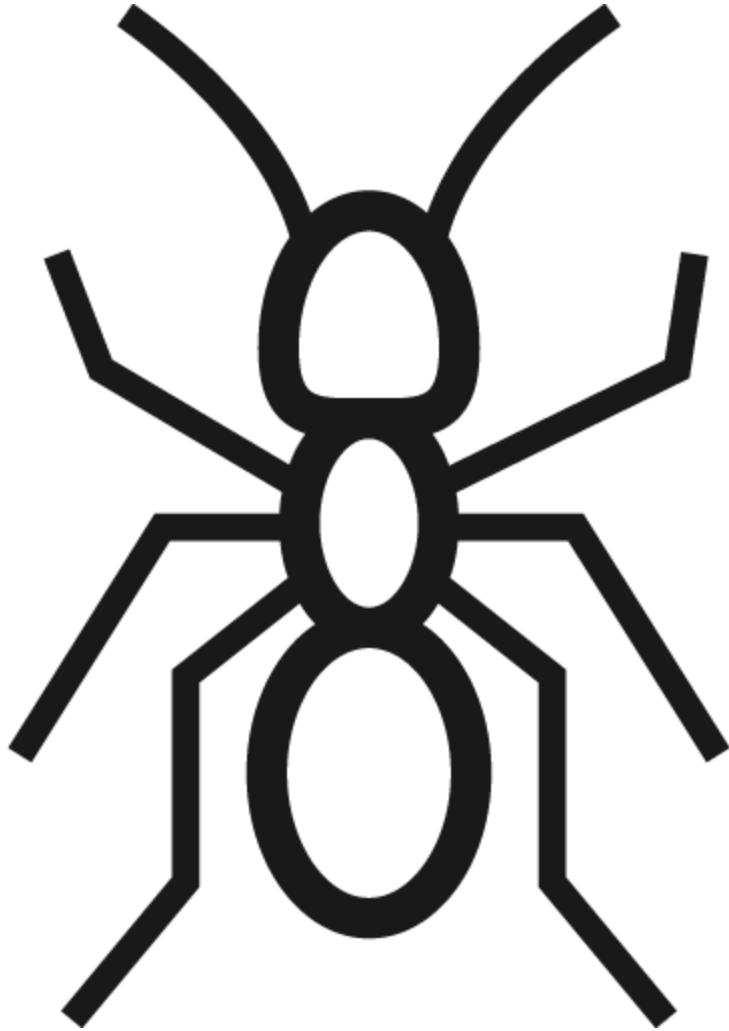

Butterfly

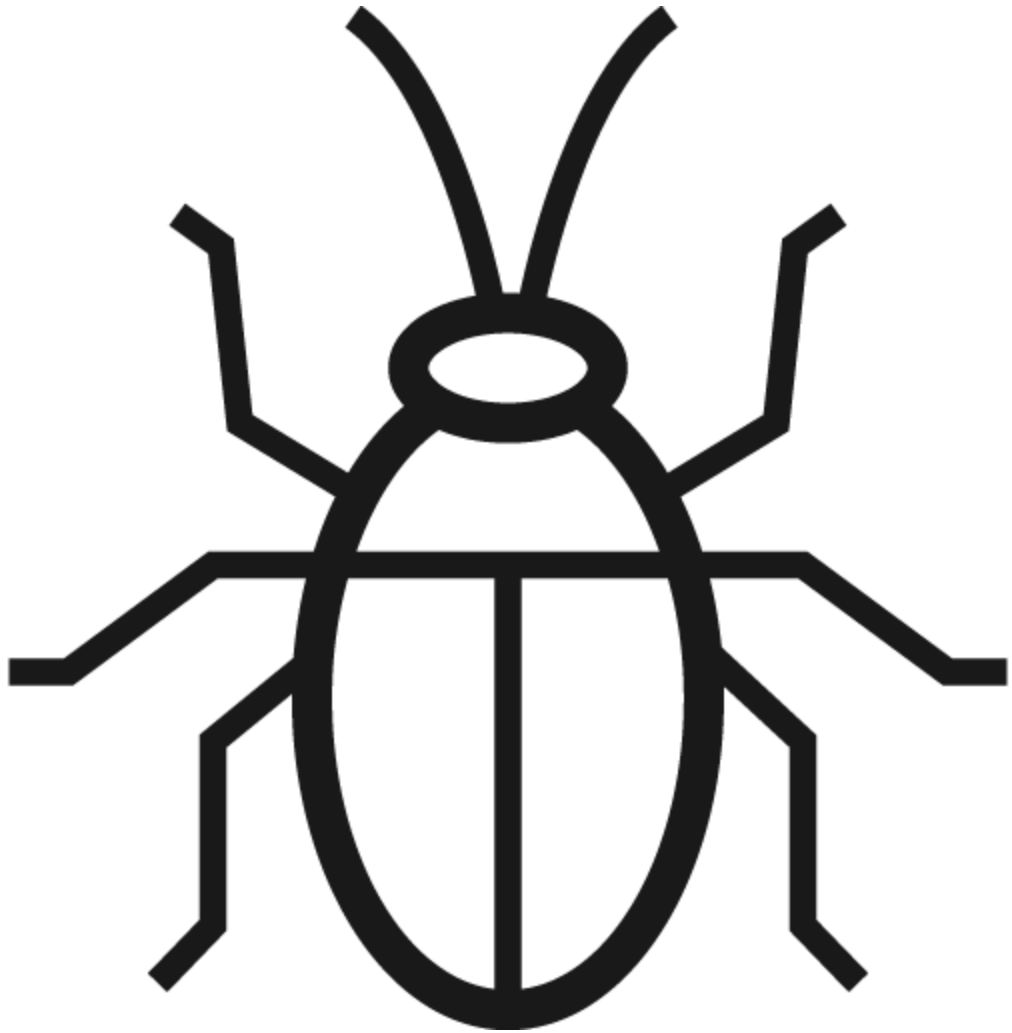

Bee

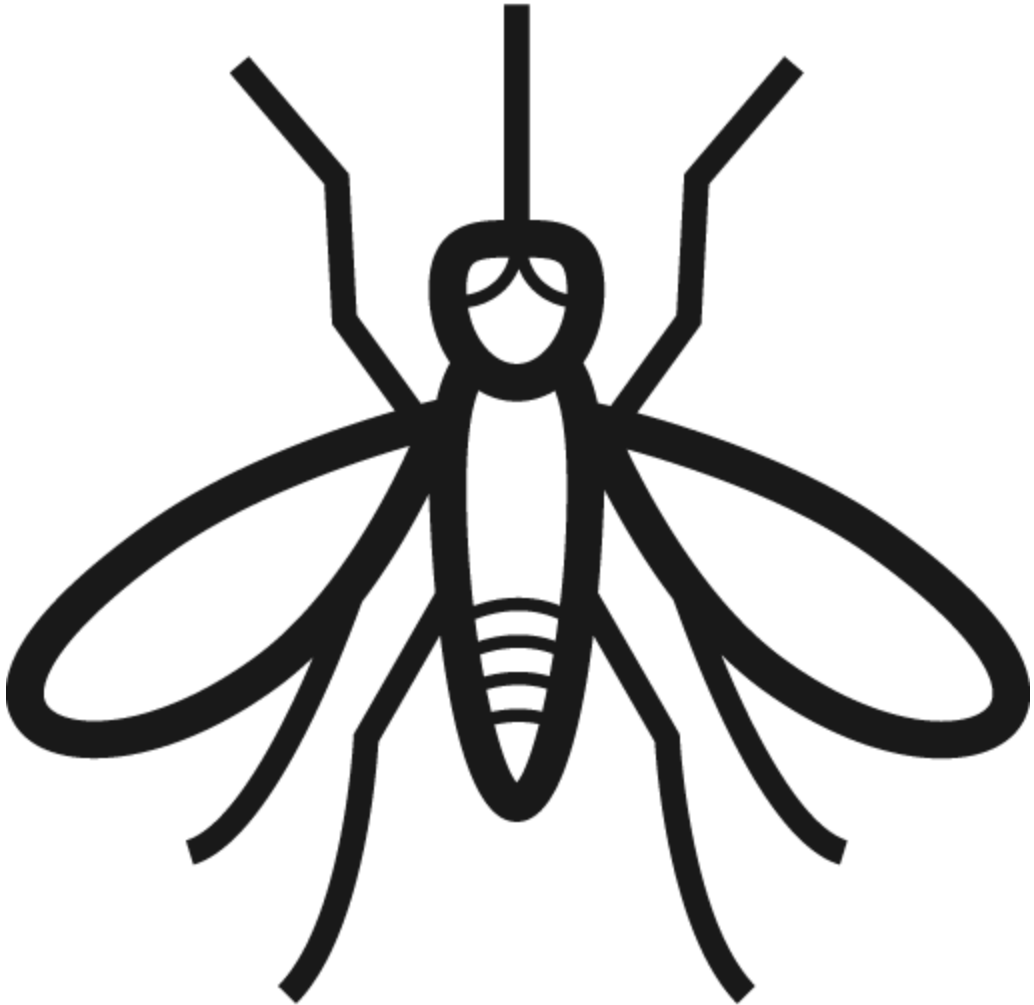

Ant

Beetle

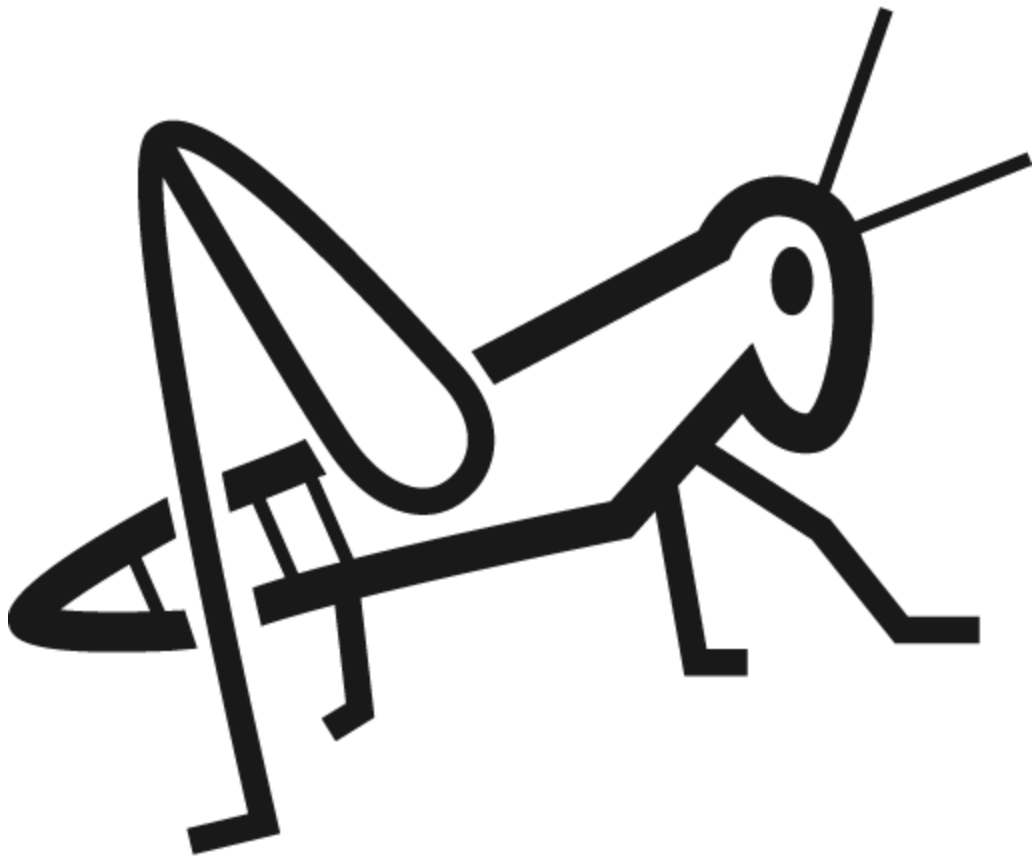

Mosquito

Dragonfly

Grasshopper

Caterpillar
